

Our expertise in heavy-duty diesel engines gives you peace of mind when choosing aftermarket filtration for your 4WD.

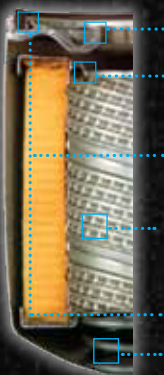

Most other 4WD filter brands are derived from the general automotive car industry, and their filters simply aren't designed for off-road heavy-duty diesel engines.

With nearly 100 years of experience in filtration technology, Donaldson's high quality products have been designed to meet or exceed OEM specifications.

Donaldson 4WD filter kits contain the necessary air, oil and fuel filters for most popular heavy-duty 4WD's in Australia. Each 4WD kit offers savings off the individual filter prices - so why not stock up for your next trip or service and keep a spare kit in the boot!

Durable and Reliable Oil and Fuel Spin-On Filtration Technology

Donaldson lube and fuel filters are designed to keep fluids clean by capturing contaminants.

Thread Plate Tapered thread profile. Simple installation preventing chance of cross-threading.

Inner Seals Donaldson filters use a moulded elastomer seal. Some other brands use non heavy-duty materials like paper, cork and spacers.

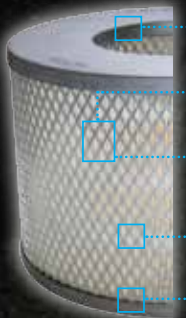

Gaskets Oil and fuel fluids have their own unique chemical properties. Donaldson makes sure the right shape and materials are used to fit the mounting head or housing.

Centre Tube Louvred centre tube and spiral lock seam design allows more flow area with greater collapse strength and eliminates media pleat tip wear.

Designed for Strength Fully tucked seams attach the thread plate to the housing can for strength and durability.

Heavy Duty Coil Spring Ensures media pack is held in position correctly during operation to prevent by-pass

Industry Leading Air Filtration Technology Our high quality air filters have been designed specifically for diesel engines and are built to withstand harsh environments whilst still protecting your valuable investment.

Robust Construction Manufactured using quality components for extra strength.

Superior Filtration Media Technology Designed to meet or exceed OEM specifications.

Pleatloc Media Spacing For uniform media spacing. Keeps media from bunching and promotes longer service life.

Heavy-duty liners Designed and built for durability to withstand harsh environments.

Filter End Caps Designed to protect the media and provide structure integrity.

Donaldson is a leading worldwide provider of filtration systems that improve people's lives, enhance our Customers' equipment performance, and protect our environment.
